- Developed Project Plans , Budgets and Timelines to ensures Sucessful Completion of Projects.
  - Managed resources Such as Equipments , Material , and personal and Subcontractors to achieve Project Goals .
- 

### PROJECTS

**Netflix Login page:-** The Netflix login page project, crafted with HTML, CSS, JavaScript, and React.js, seamlessly merges frontend technologies to create an immersive user experience. Through HTML, we construct a structured layout comprising essential elements like forms and buttons.

**Quiz-platform:** - A React-based quiz platform is a web application built using the React JavaScript library, designed to facilitate the creation, management, and taking of quizzes. Registered users can create quizzes by adding questions, multiple-choice options, and correct answers. Immediate feedback on quiz submissions, including correct answers and scores.

**Notes Keep:** - Your Notes on the GO: Built a Node.js project with secure JWT authentication for user registration, login, and session management, ensuring data privacy and security. Implemented CRUD operations for efficient note management to securely add, view, update, and delete notes. Ensured a seamless user experience by incorporating features for personalized note creation, comprehensive note viewing, and easy note modification or deletion.
